

Step-by-step guide for installation:

Tools and Materials:

- Screw-to-screw hinge
- Screws (appropriate size)
- Drill with bits
- Screwdriver or wrench
- Measuring tape or ruler
- Marker
- Protective gear (gloves, goggles)

Instructions:

1. **Preparation:**
 - Gather all materials and tools. Wear protective gear.
2. **Mark Hinge Placement:**
 - Measure and mark the positions for the hinge on both the door/lid and the frame.
3. **Drill Holes for Screws:**
 - Drill pilot holes at the marked spots where the hinge will be attached, ensuring they align on both the frame and door.
4. **Attach the Hinge:**
 - Position the screw-to-screw hinge on both surfaces. Insert screws into the holes and tighten them securely with a screwdriver or wrench.
5. **Test Functionality:**
 - Open and close the door or lid to ensure the hinge operates smoothly and is securely attached.
